

Welcome
to TRACK_IT!

Summary

What is TRACK_IT!

TRACK_IT! is a program that brings tracking status's to one place. We have made an application that allows you to search for tracking status's from multiple shipping services (Ex. FedEx, UPS).

Our goal is to save everyone some time when searching for packages and to have a responsive team to continue quality of life changes as the shipping world evolves.

Let's take a look on how this program works....

Let's get Started

Manual on How to Use TRACK_IT!

01

Small Code Change

To get Track_It up and running you will first need to edit the python file. Once you open this just insert the correct path of the assest folder (Line 12). After you change this, save it and you are ready to get started.

Buttons

Once you open the TRACK_IT Program, you will see 3 buttons at the top. Patch Notes, Manual and Exit. The PatchNotes button will bring up the latest improvements that we have made and show future plans for TRACK_IT!. The Manual button will open up this manual you are reading and the Exit button will close down TRACK_IT.

02

03

Searching Status's

Now to the main part of TRACK_IT!. In the middle of the window is a Searchbar. You will use this to enter your tracking numbers. Once you enter a tracking number, press the TRACK_IT! button to search for the status.

Important Note! - Only a single tracking number can be entered at a time.

Important Note! - USPS tracking is not available yet. (Refer to Patch Notes 1.001)

That's_IT!

Let's use TRACK_IT!

That is everything important about TRACK_IT!. It is now time to introduce this to your workflow.

Good Luck!

And if you need anything feel free to reach out to us.

Thank you for using TRACK_IT!
